

AARADHYA GOPAL NEPAL

MID LEVEL FLUTTER DEVELOPER

Description

I am an enthusiastic Flutter Developer and also known as a code geek whose life purpose is to achieve a complete level of mastery in software development industry. Since my teenage age, coding and computers was always a passion for me and to embrace that passion I had chosen Mobile Development.

With lots of research, practice and projects, I have very good foundation of Flutter and Programming Concepts. And now I want to use that strong foundation and my entire 20's youth to contribute something great in IT industry.

Major Experience (1 Years)

1) Himalayan Techies

Full Time Mid Level On Site Flutter Developer

3 Month Contract : October 10 2022 - January 14 2023

The major project I worked in this company was **Marvel Technoplast** Application. In this application we had done every thing in a clean coding way, by following Data-Domain-Presentation Architecture, with BLOC state management in presentation layer. Not only that Screen Util was used to make the application responsive to any size of the device. It was great learning opportunity to work in this project. **Marvel Link: Click Me**

With that I also worked on small hotfixes, few new UI pages and refactoring previous messed code on **Hash** - Runners managing application and on "**Yo Kasko Awaj**" Application for OLE Nepal.

2) Byte Care

2021

- **3 Month:** Internship

[Bytecare](#)

Certificate

- **3 Month:** Paid Freelance Project
Online Gharjagga: [Playstore Link](#)

Initially I had done 3 month free internship at ByteCare. But after the intern contract ended, I worked 3 more month on a project named Online Gharjagga. Online Gharjagga is a Real State Application for both agency and for buyers. In first 2 week I developed Initial UI with another teammate, after that for next 3 months, by myself with no other teammate I had done entire application's JSON integration, bugs fixing, UI fix and much more till the app was first launched.

Phone

9800915400

Email

aradhya.1441@gmail.com

Address

- Currently Thapagaun Hostel, New Baneshwor
- **In Future, Hostel as per the Office Location.**

Skills

- Flutter Framework
- Dart, and deep programming concepts
- BLOC & Provider
- Clean Coding (Uncle Bob)
- JSON Integration
- Pro Git & Github
- SQL Database
- Team Cooperation and Team Leading
- Basics on Django API and Firebase

****Every Company have its own tools requirements for there Flutter Projects, so I am open to learn new things as per the need.**

Socials

Education

B.Sc(Hons). Computing

Itahari International
College (Sunsari, Nepal)

AARADHYA GOPAL NEPAL

FLUTTER DEVELOPER

3) Digi3Map : Github Link

Bachelor's Final Year Project (Flutter + Django API)

- **6 Months** : Final Year
Project Named Digi3Map

2022

Demonstration Video

Certificate

(Top 40 Project out of 200 student)

This project is a multiplayer self productivity application where random 10 players are placed in a group chat portal and they are supposed to compete with each other using my application. The good things about this project is in very limited time frame, 90-95% of Flutter development was done, using flutter basics without any libraries, like making PIN code, Graph, group chat, and much more all using flutter basics.

Minor Experience

1) Native Android (Basics):

2019

Broadway Infosys

- **Native Android Course**

Certificate

In class 12, I started Native android development. And after that I joined android class at Broadway Infosys. By this I have basics knowledges of Native Android Development.

- **Apk Link** (At this date, some apps are unstable)

2) Covid-19 Space App Challenge

With my teammate I had once taken part in Space App Challenge. In this challenge I learned lots about team working. A detailed instruction about this project and teammates with whom I worked can be found below.

- **Project Link** **Certificate**

3) IT Talk Series (On Campus Event)

With two other teammates, I had also given a presentation on Netflix and Netflix's recommendation system. Under the guidance of teacher, it was great a learning opportunity of developing soft-skills. After this event I became so perfect at presentation that now I have no fear to give presentation on middle of huge crowd.

AARADHYA GOPAL NEPAL

FLUTTER DEVELOPER

Books That Inspired Me

- Uncle Bob's Clean Coding.
- Pro Git
- Scrum: The Art of Doing Twice the Work in Half the Time
- Atomic Habit

Hobbies

- Coding
- Refactoring
- Reading Coding Book To Enjoy Me Time
- Gym

Personality

(Big 5)

- Hyper Industrious and Hard Working
- High in Openness, 85th Percentile
- Competitive and Less Emotional
- Less Impulsive yet Assertive
- Less Neurotic under pressure

4) Leading College Teammates On there Final Year Project

I had given my contribution on 2 of my teammates friend's final year project. I have good research and fast learning skills on technical topics compared to them. So, I had given guidance to the friend like a tuition teacher, teaching them everything from the basics and helped them when they faced some bugs.

- The first was, **Online Food Delivery Application**, I had given guidance on Django API, Backend integration and **Khalti Test Mode API**.
- The second was, employee performance prediction website using **Linear Regression AI Model** and **Django Website**.

So by this it was good learning opportunity but mainly I learned lots about Team Leading and cooperating with teammates .

5) Udemy Course

I had watched 3 Udemy courses. First was on Native Android way back in the history after completing my +2. Then 2 Flutter courses were by Maximilian and by Dr. Angela Yu, done when I was in Bachelor . By this I have very strong foundation on Flutter.
