

AARADHYA GOPAL NEPAL

MID LEVEL FLUTTER DEVELOPER

About Me

I am a enthusiastic Flutter Developer. With clear understanding of programming basics, I have nearly 1 years of real world experience of developing Flutter application, Yet I started programming learning journey, since I was in class 12. I also have good understanding of Git, SQL and other development concepts. Not only that, thanks to my Bachelor's, I have developed good presentation, group working, time management skill, and other social skills making me a ideal employee for your company.

Experience

1) Online Gharjagga: Playstore Link

Internship Final Application (Flutter)

Initially I had done 3 month free internship at ByteCare. But after the intern contract ended, I worked 3 more month on a project named Online Gharjagga. Online Gharjagga is a Real State Application for both agency and for buyers. In first 2 week I developed Initial UI with another teammate, after that for next 3 months, by myself with no other teammate I had done entire application's JSON integration, bugs fixing, UI fix and much more till the app was first launched.

2) DigiMap : Github Link

Bachelor's Final Year Project (Flutter + Django API)

This project is a multiplayer self productivity application where random 10 players are placed in a group chat portal and they are supposed to compete with each other using my application. The good things about this project is in very limited time frame, 90-95% of Flutter development was done, using flutter basics without any libraries, like making PIN code, Graph, group chat, and much more all using flutter basics.

Project Demonstration **Video** **Certificate** (Top 40 out of 200)

Journey

2019

Broadway Infosys

Certificate

- **Native Android Course**

2021

Bytecare

Certificate

- **Flutter Internship + Paid Project**

2022

Itahari
International
College

- **Completed Bsc (Hons) Computing**
(London Metropolitan University - ING group)

Waiting For Graduation Certificate
